

Renildo Pereira

Full-stack developer

rrenildopereira@icloud.com | +351938454958 | Barreiro, Portugal | www.linkedin.com/in/rrenildopereira/ | renildo.dev

PROFILE

Full-stack developer with more than three years of hands-on experience building user interfaces, reusable components, design systems and developer tooling. Creator and maintainer of Yumma CSS and Yumma UI, working in React, Next.js, TypeScript and modern CSS. Rebuilt a production build pipeline, cutting compile time from roughly 13 seconds to 10 milliseconds. Focused on solving complex technical problems, on accessibility, and on solutions that stay simple enough to maintain.

EXPERIENCE

Customer Support Consultant

April 2026 – Present

Concentrix · Lisboa, Portugal

- Support customers across voice, email and chat, answering questions and presenting solutions clearly and professionally.
- Analyze customer needs, diagnose problems and route each case according to internal procedures.
- Work with other departments to resolve issues that need further investigation or follow-up.

Frontend Developer

October 2023 – Present

Yumma CSS · Barreiro, Portugal

- Lead the design and development of a CLI-first CSS framework built for scalable design systems and a consistent developer experience.
- Rebuilt the Yumma CSS v3 build pipeline, replacing SCSS with a custom TypeScript compiler and cutting compile time from roughly 13 seconds to 10 milliseconds, an improvement of about 1300 times.
- Design and standardise reusable, accessible interface components and the foundations of a design system, using React, Next.js and TypeScript.
- Build and maintain open source packages, interactive documentation, a live testing environment and supporting frontend tooling.
- Built and maintain an interactive playground for testing, exploring and demonstrating the components and features of the projects.
- Define architectures, APIs and workflows aimed at reuse, clarity and long-term maintenance.

PROJECTS

Yumma CSS · A utility CSS framework derived from CSS property names, built CLI-first for scalable design systems.

Yumma UI · Accessible components you add to your project from the terminal, built on Base UI.

Playground · An interactive environment for testing and demonstrating the features of both projects.

EDUCATION

Information Systems Management and Programming, Level 4

2022

Escola Profissional Bento de Jesus Caraça
